PHD DEGREE CANDIDATE, CIVIL & ENVIRONMENTAL ENGINEERING, NATIONAL UNIVERSITY OF SINGAPORE

---

EDUCATION	<b>Zhejiang University</b> , Hangzhou, China <i>Master of Engineering</i> , Shipbuilding and Oceanography Engineering <b>GPA: 3.86/4</b> (1/40) <b>National University of Singapore</b> , Singapore <i>PhD</i> , Civil Engineering	2018.9 - 2021.6    2021.8-
-----------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------

---

RESEARCH INTERESTS	Wave Attenuation by Vegetation, Wave and Tidal Energy Converter Risk Analysis of Coral Reefs, Turbulence
--------------------	-------------------------------------------------------------------------------------------------------------

PUBLICATIONS	<b>Zhengyu Hu</b> , Fang He. Laboratory Study of Turbulent Kinetic Energy within Mangrove Forest under Waves. ( <a href="#">Preprint</a> )  <b>Zhengyu Hu</b> , Fang He. Experimental Study on Wave Attenuation by Vegetation by means of Particle Imaging Velocimetry. ( <a href="#">Preprint</a> )  <b>Zhengyu Hu</b> , Fang He. Laboratory Study of Wave Attenuation by Mangrove Forest. ( <a href="#">Preprint</a> )  <b>Zhengyu Hu</b> , Fang He. Numerical and Experimental Study on the Interaction between A Novel Coral Nursery and Current. (To be submitted)  Fang He, <b>Zhengyu Hu</b> . 11 Chinese Patents. <a href="#">More details</a>
--------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

---

AWARDS & ACHIEVEMENTS	Awarded the <b>Academic scholarship</b> , China Awarded the <b>Zhoushan Chamber of Commerce scholarship</b> , China Awarded the <b>Excellent graduate student</b> , Zhejiang University, China Awarded the <b>Triple-A graduate student</b> , Zhejiang University, China
-----------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

RESEARCH PROJECTS	<b>Research and Application of Marine Hazard Reduction Evaluation and Establishment Optimization Technology of Typical Coastal Wetlands</b> <i>Supervisors : Prof. Pengzhi Lin and Prof. Fang He</i> Aug '1, 2018 - June '30, 2019 <ul style="list-style-type: none"><li>- Field Investigation, Data Collection and Characteristics Analysis of Typical Coastal Wetlands</li><li>- Study on the Interaction between Typical Coastal Vegetation and Storm Surge</li><li>- Study on Evaluation Method of Hazard Reduction Function of Vegetation in the Coastal Wetland</li><li>- Study on Optimization Technology of Vegetation Construction in the Coastal Wetland</li></ul> <b>Study on Damage Mechanism and Risk Early Warning Method of Marine Dynamic Hazard on Coral Reef</b> <i>Supervisor : Prof. Fang He</i> Oct '18, 2019 - Present <ul style="list-style-type: none"><li>- Field Research and Development of Coral Nursery for the Restoration of the Coral Reef Ecosystem</li><li>- Numerical and Experimental Study on the Interaction between a Novel Coral Nursery and Current</li><li>- Risk Assessment, Zoning and Early Warning of Storm Hazard on Coral Reefs in China</li></ul> <b>Study on Hydrodynamic and Wave Dissipation Characteristics of Permeable Breakwater with Oscillating Water Column Wave Energy Converter</b> <i>Supervisor : Prof. Fang He</i> Sep '15, 2018 - Dec '15, 2019
-------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

- Experimental Study on Hydrodynamic Characteristics and Oscillating Flow Field Characteristics of Oscillating Water Column Breakwater
- Physical Experiments and Numerical Simulations of Cylindrical Oscillating Water Column Wave Energy Converters

**Evaluation and application of wave attenuation by vegetation based on neural network and laboratory study**

*Supervisor : Zhengyu Hu*

*Dec '1,2019 - Present*

- Predicting Wave Attenuation by Vegetation Based on the Neural Network Algorithm
- Experimental Study on Wave Attenuation by Vegetation by Means of Particle Imaging Velocimetry
- Predicting Turbulent Kinetic Energy within Vegetation and Wave Attenuation by Vegetation Based on the Neural Network Algorithm

---

**WORK  
EXPERIENCES**

**Undergraduate Course - Port and Coastal Hydraulic Structures - Zhejiang University**

*Teaching Assistant*

*Mar '14,2019 - June '14,2020*

- Provided tutoring to 60+ undergraduate students in experimental lessons
- Experimental lessons include *Interaction between Waves and Vertical Breakwater*, *Interaction between Waves and Sloping Breakwater*, *Interaction between Waves and Piles*

**Undergraduate Thesis - Zhejiang University**

*Adviser*

*Dec '13, 2018 - June '15, 2020*

- Designed experiments and outlines for three undergraduate students
- Undergraduate thesis topics include *Study on Wave Attenuation Characteristics of Coastal Vegetation* (2019), *Interaction between Vegetation and Unsteady Flows* (2020), *Experimental Study on Oscillating Flow Field of Oscillating Water Column Wave Energy Converter* (2020)

---

**LEADERSHIP  
EXPERIENCES**

**Students' Association Union - Zhejiang University**

*Vice President*

*Sep '15, 2018 - June '15, 2019*

- Organized 10+ cultural and sports activities with average attendees of 200+ students
- Managed all of Students' Association and promoted them

---

**RESEARCH  
SKILLS**

**Laboratory:** PIV, LDV, ADV, EMF, Wave gauge, Pressure sensor, Load cell, OQUS 6-DOF capture

**Field observation:** RBR for wave&tide , SeaGuard RCM for velocity

**Numerical simulation:** Mike21, Flow-3D, Star-ccm+

**Research Tools:** Python, Matlab, Origin I<sup>A</sup>T<sub>E</sub>X, Solidworks, AutoCAD, Tecplot, ArcGIS, PS

---

**EXTRA  
INTERESTS**

**Deep Learning & Coastal Engineering**

**Basketball**

**Chinese Kung fu**
